The Atlas of Lumps and Bumps at 50

Anthony Calabro, MA

Volume 65 - Issue 5 - May 2025

At *Consultant360*, we are proud to celebrate a remarkable milestone: the publication of the 50th installment of our long-running dermatology series, *Atlas of Lumps and Bumps*. For more than 4 years, this series has remained a trusted visual guide for countless primary care clinicians, dermatologists, and learners seeking to sharpen their diagnostic acumen.

We extend our deepest gratitude to the authors who have made this achievement possible: Dr Alexander K.C. Leung, Dr Benjamin Barankin, Dr Joseph M. Lam, and Dr Kin Fon Leong. Their clinical expertise, commitment to medical education, and ability to distill complex dermatologic presentations into concise, image-rich cases have made the series an invaluable resource.

We thank the authors for their sustained contributions and congratulate them on reaching this impressive 50-part milestone in "describing and differentiating dermatologic lumps and bumps."

You can read the 50th article from the *Lumps and Bumps* series [here](#). We'll have one more bonus article next month to close out the series. Explore the full [Atlas of Lumps and Bumps archive](#) at Consultant360.com, where each case continues to inform health care practitioners.
